“To us, xyz stands as a **subtle rebellion** against the status quo. While it's equally (if not more) **memorable** than a legacy TLD, it also conjures feelings of mystery, excitement and innovation. Additionally, being at the end of the alphabet it has a similar feeling of finality that you might find in the phrase "qed".”

— Alex Fine, CEO

“.xyz is the domain of a **new generation and new technologies**. It's where everything interesting is happening. .Com is like your father's Oldsmobile. When people see .xyz, it's an immediate clue that you're doing something **cutting edge**, not just technically but culturally.”

— Chris Heatherly, CEO

“I decided to use .xyz for my website because it was more graphically pleasing than other options available. It felt **unique** and **didn't lock me into a specific box!**”

— Abbey Howard

“We chose .xyz because **it felt modern and creative**. We also wanted our web presence to feel youthful and contemporary, and we felt .xyz embodied that vibe!

— Chris Carboni, Founder & Executive Creative Director
